

Lattice Training Plan – 21st of August 2023 to 13th of November 2023

"Build/ base: The main goals of this training plan are: -Develop finger strength - Develop an efficient training structure -Reach sport goals of: consistent @ 7a You have a relatively well balanced profile for a climber of your grade, with only your finger strength showing as lower than we would like, therefore this is the main focus of the 12 week training plan... Boulder sessions look to tap into high end strength to ensure you are capable of completing the hardest crux sequences on sport routes you aspire to do. Conditioning sessions concentrate on developing strength in the wrists and shoulders, which are integral when fingerboarding. We also look to diversify upper-body strength as this seems to be well-developed in your profile. Energy system work takes a more maintenance approach as this already seems to be a strong attribute of yours: we still use one roped session a week to develop your anaerobic capacity. "

				August			September				October				November	
Session	Prog.	Variation		21st	28th	4th	11th	18th	25th	2nd	9th	16th	23rd	30th	6th
